**A lifting force with reliable technology and
trust for rising safely—SAMSUNG HOIST**

In our world, “responsibility” is the heaviest.

In our world, “faith and confidence” are the most difficult to transport and handle.

Building the future with more passion

Advancing toward a bigger world

SAMSUNG HOIST pursues a brighter future with challenge and innovation.

SAMSUNG HOIST not only manufactures heavy lifting machines but also ambitions to carry the passion of customers and realize their dreams regardless of how big those dreams are.

SAMSUNG HOIST has a mission of manufacturing machines.

Moreover, it needs to carry the great responsibility of safely transporting freight.

SAMSUNG HOIST does not place the burden and responsibility that it needs to cope with in machines.

Even though it is a difficult journey, we will continue with these beliefs.

It is the path that SAMSUNG HOIST has followed and the only principle that it keeps.

[What We Make](#)

Customer's strong bridge building confidence with safe technologies

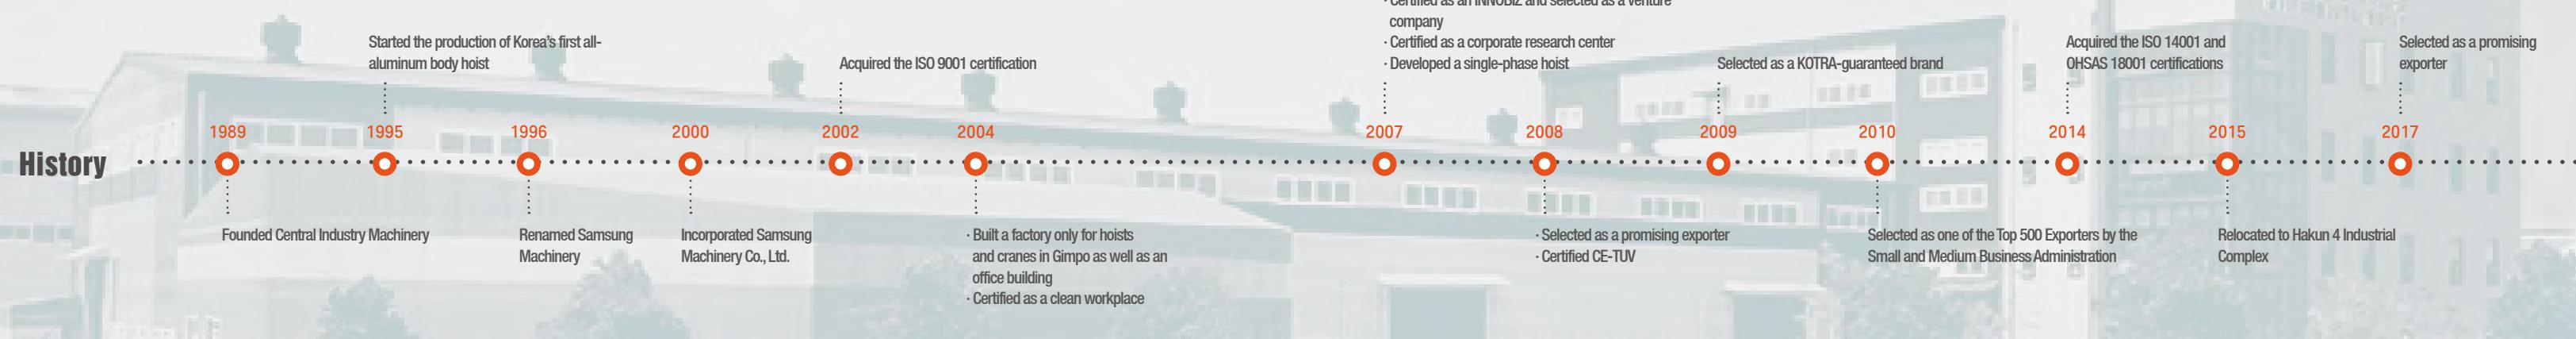

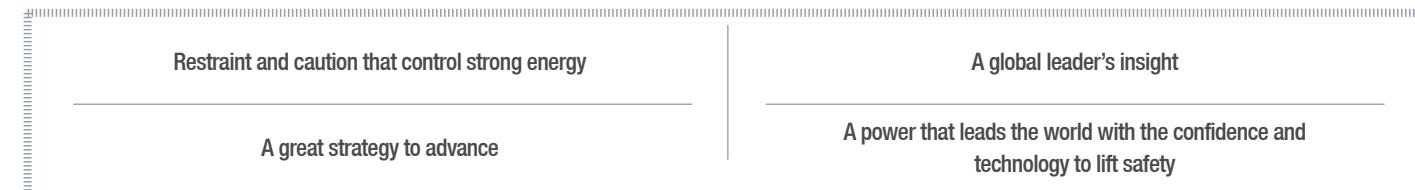

Global brand with a passionate and competitive spirit

» Company Overview

People ask
where the power of SAMSUNG HOIST comes from

People ask
how to control the power of SAMSUNG HOIST

» Vision

Future with Trust

SAMSUNG HOIST will manufacture heavy-duty products with great responsibility. It will develop material handling equipment that transports and handles any heavy load, and establish "faith and confidence" with customers.

Global Future Machinery

SAMSUNG HOIST manufactures the safest and most reliable material handling equipment. It will show its strength to the world and lead a brighter future as a primary material handling equipment manufacturer.

» Mission

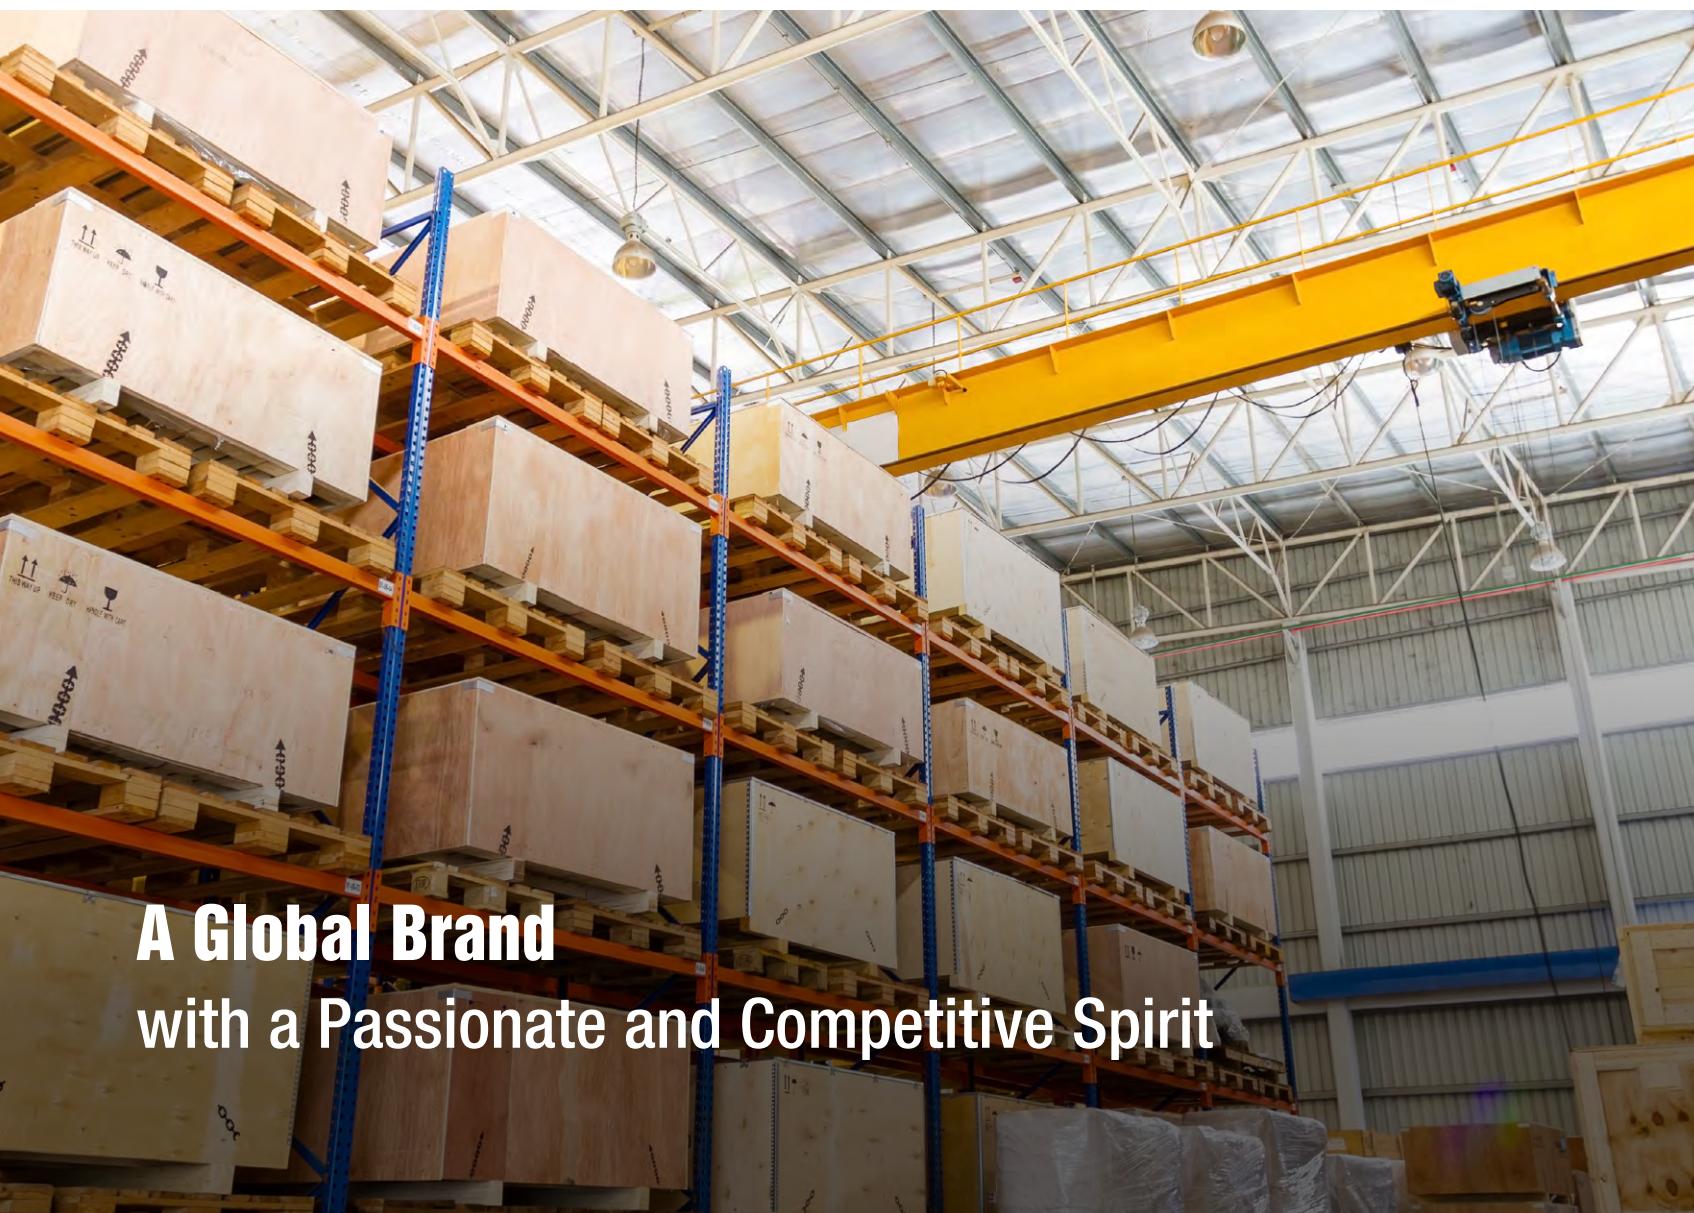

In the 1980s, SAMSUNG HOIST established a safety-first system to build people-oriented industrial sites in the local material handling equipment industry and recorded a zero accident rate at material handling equipment construction sites. It continuously invests in facilities, and exerts its efforts for research and development because of the manufacture of various technologies that dramatically increase work efficiency in industrial sites. SAMSUNG HOIST's management philosophy focuses on "safety management" and "responsibility management" that always prioritize people's safety.

>>> What We Make

With technologies accumulating and quality improving for a long time, SAMSUNG HOIST specializes in manufacturing hoists, cranes, saddles, and geared motors. It is well known as a Korean professional brand of machines with a passionate and competitive spirit that transports as well as loads and unloads freight in European, Central and South American, Southeastern, Middle Eastern, and African countries as well as in Korea.

Based on the technologies and trust built for the past 30 years, SAMSUNG HOIST had given customer convenience and guaranteed safety in the industrial field. It has also grown as a reliable global brand with high competitiveness that is well recognized in the world. SAMSUNG HOIST will create a future full with hope by giving high satisfaction and establishing trust.

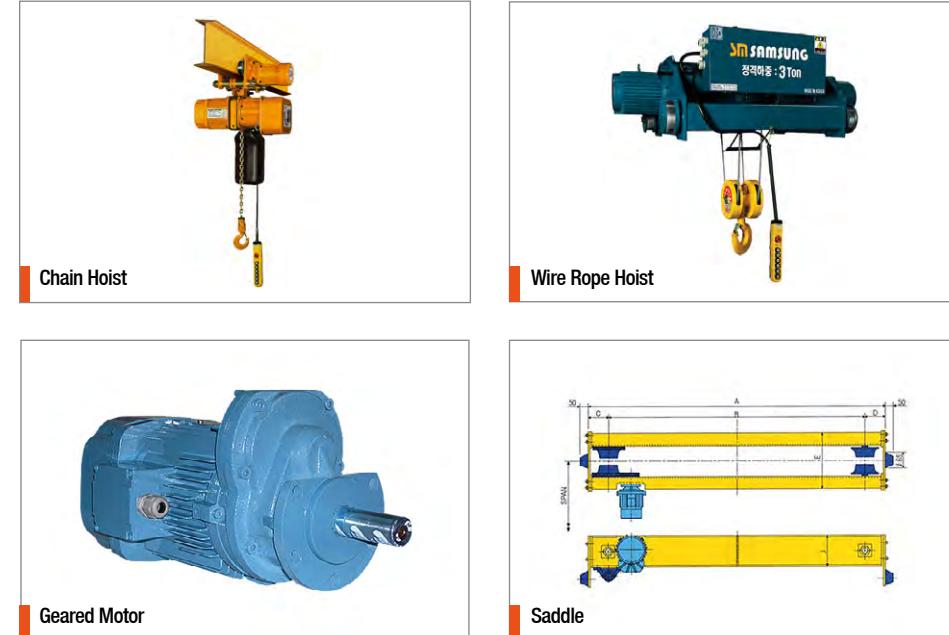

**A Global Brand
with a Passionate and Competitive Spirit**

HOIST&CRANE

A hoist is a machine that moves freight up and down, left and right, and front and back by hanging it with the power. Its operation methods are hoisting that lifts freight, traversing that moves freight horizontally, turning, and incoming. With these methods, a hoist crane intends to transport and handle freight securely.

PRODUCTS

SAMSUNG HOIST is a global brand of machines that transports freight. It exports its products to various parts of the world such as European, Central and South American, Southeastern, Middle Eastern, and African countries.

CHAIN HOIST

It is a motor optimally designed for a hoist crane with strong maneuverability and durability during operation, a traversing brake with a proper inertia when freight is braked according to the intended use, a hoisting brake designed to have high durability against high temperature and load caused by sudden brake resulting in long life, and a frame that maintains strength by using aluminum alloy for economic feasibility and ease of handling by reducing the weight. This chain hoist is designed and manufactured with a low-voltage operation method to minimize impact on the human body when an electric shock occurs during operation. In particular, its body is optimally designed to closely access the ceiling or wall of a workplace or a narrow place as much as it can by making a hoist smaller and lighter compared with the chain hoists or wire hoists of other companies. Regardless of the height of a building, its volume can be maintained by simply controlling the length of the chain. Furthermore, through several years of design and quality improvement, SAMSUNG HOIST manufactures high-quality products for the great performance of motors, decelerators, and brakes even in the case of uneven power supply with an error within 10%, an overload within 125%, or a 30 min rated operation, and exports its products in Korean and, especially, overseas markets.

WIRE ROPE HOIST

A wire rope hoist intends for up-and-down actions by using a wire rope and a drum that winds the rope to transport high-capacity freight or diverse freight. SAMSUNG HOIST supplements and improves the existing wire rope hoist based on its experiences and technologies accumulated when manufacturing hoist parts. It also manufactures and supplies wire hoists by handling high speed, high capacity, and special regions within the restricted range of a chain hoist.

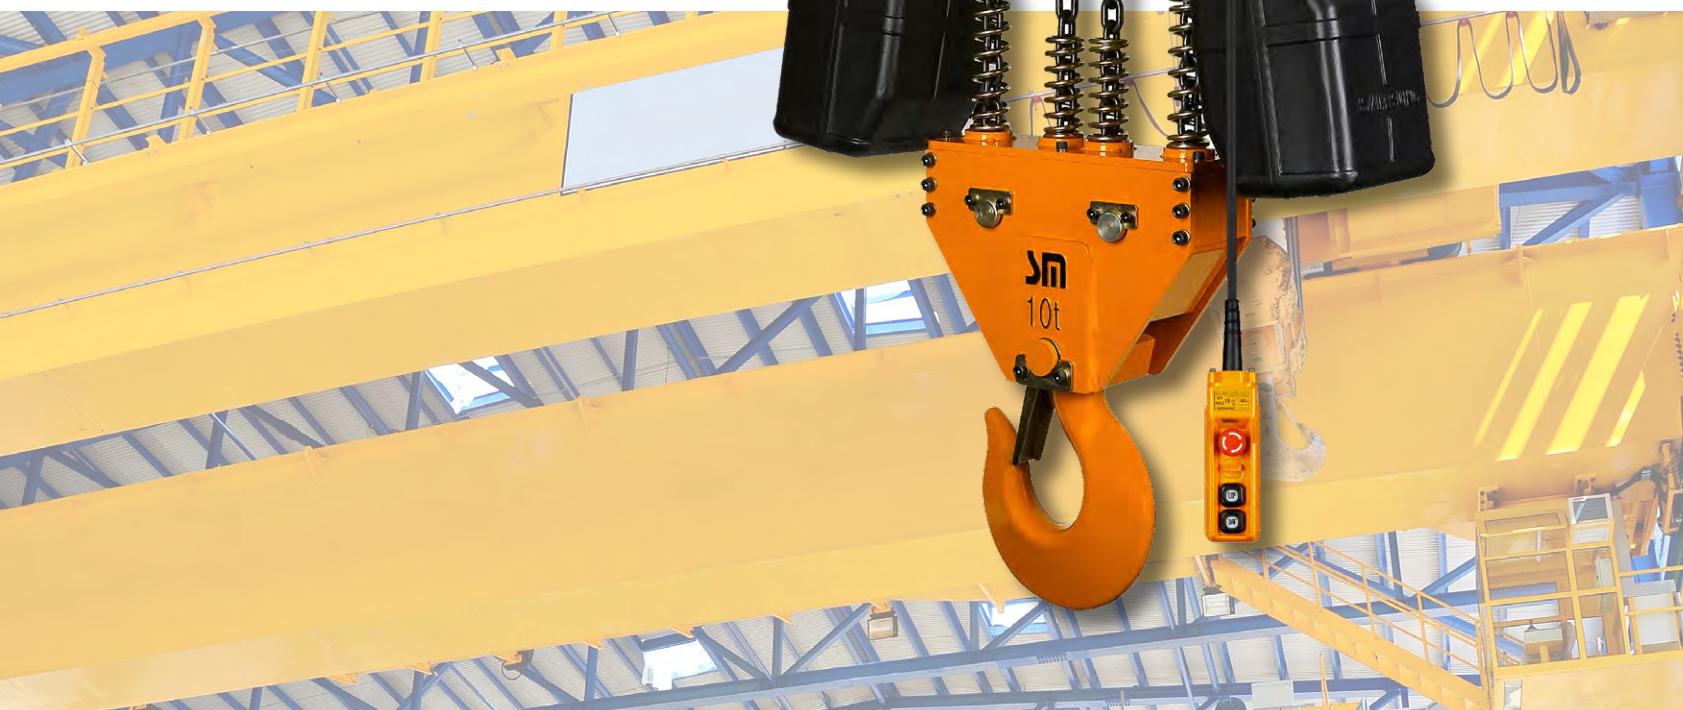

CRANE

A hoisting crane is generally composed of a hoist that lifts freight, a girder designed to move a hoist horizontally and withstand the load of the freight, and a saddle that moves the freight in a travel direction under the load of the entire crane by fixing a girder. It transports freight up and down, left and right, and front and back securely.

There are diverse hoist cranes optimized for various environments. For example, an overhead crane is composed of a girder and a saddle on the travel rail generally used as well as a hoist, a suspension crane is designed to suit a narrow place with a low ceiling, a JIB crane is used for low-capacity freight in a narrow place or on the wall, a gantry crane is used in a place where no structure can withstand a crane, and a lightweight crane is optimized to move a light freight quickly.

SAMSUNG HOIST, which handles all areas of the production of the key parts of machines for transporting as well as loading and unloading freight, realizes the manufacture of products with the safest and best performance under the motto of "The Best Support for the Best Products."

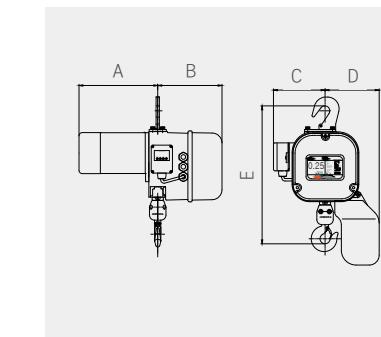

HOOK TYPE SCO series

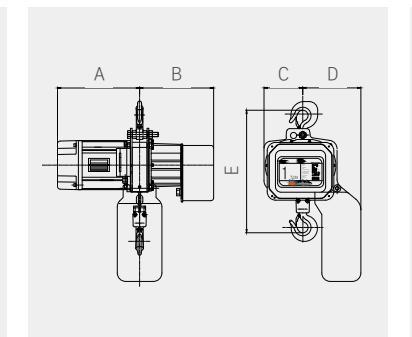

Product Overview

- Motors and brakes that boast powerful and long life
- Aluminum alloy frame that minimizes weight
- Voltage operation mode that minimizes the human body electric shock
- It using a high strength and stability FEC Chain(Made in Japan)
- Deceleration of the structure and durable material benefits that boasts ultra-quiet
- Uniform production control system to produce quality

B Frame 1000~3000kg

SPECIAL

Type

Product Overview

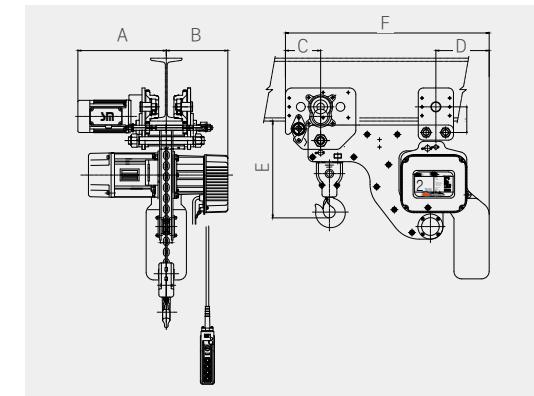

- Motors and brakes that boast powerful and long life
- Aluminum alloy frame that minimizes weight
- Voltage operation mode that minimizes the human body electric shock
- It using a high strength and stability
FEC Chain(Made in Japan)
- Deceleration of the structure and durable material benefits that boasts ultra-quiet
- Uniform production control system to produce quality

Traversing motor : 50Hz is standard 4P, 60Hz is standard 6P

EVENT TYPE

- Simple using for broadcasting & performance equipment, and easy to install and uninstall. Single & 3phases.
- Light weight, graceful appearance, and good transportation, comportable handling.

CRANE

JIB CRANE

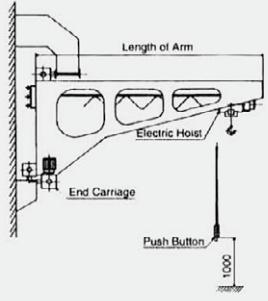

■ Wall-Mounted Slewing Jibs

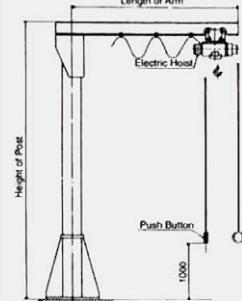

Capacity		1/2ton~3ton
Working Area	Min.	0.8m
Area	Max.	6m
Traversing Speed		16m/min
Slewing Speed	Manual	
Angle		180°

■ Wall-Traveling Slewing Jibs

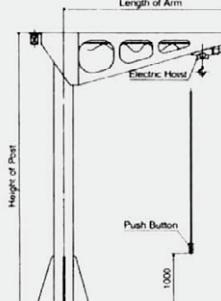

Capacity		1/2ton~10ton
Length of Arm		Max.6m
Traversing Speed		16m/min
Traversing Speed		16m/min

■ Pillar-Mounted Slewing Jibs[A]

Capacity		1/2ton~3ton
Working Area	Min.	0.8m
Area	Max.	3m
Traversing Speed		16m/min
Slewing Speed	Manual	
Angle		360°
Height of Post		Max.6m

■ Pillar-Mounted Slewing Jibs[B]

Capacity		1/2ton~3ton
Working Area	Min.	0.8m
Area	Max.	6m
Traversing Speed		16m/min
Slewing Speed	0.5rpml	
Angle		360°
Height of Post		Max.6m

Geard Motor

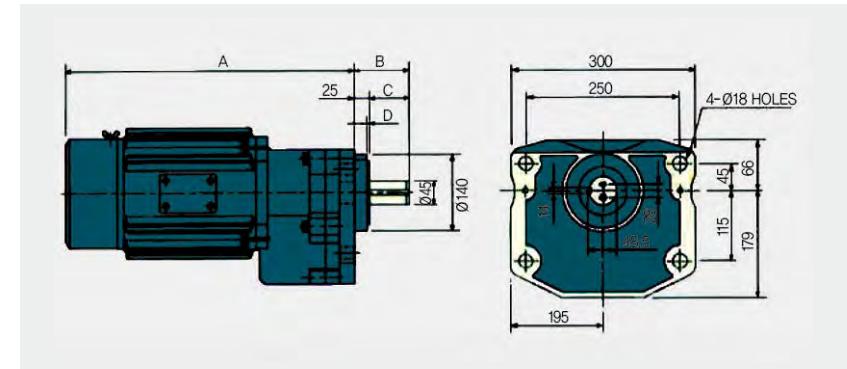

■ Model - A

	$0.5\text{Kw} \times 6\text{P} / 0.75\text{Kw} \times 4\text{P}$	$0.5\text{Kw} \times 6\text{P} / 0.75\text{Kw} \times 4\text{P}$
A	352	387
B	87	87
C	60	64
D	64	60
Ratio	$1/8.4$ or $1/12.12$ or $1/16.3$	

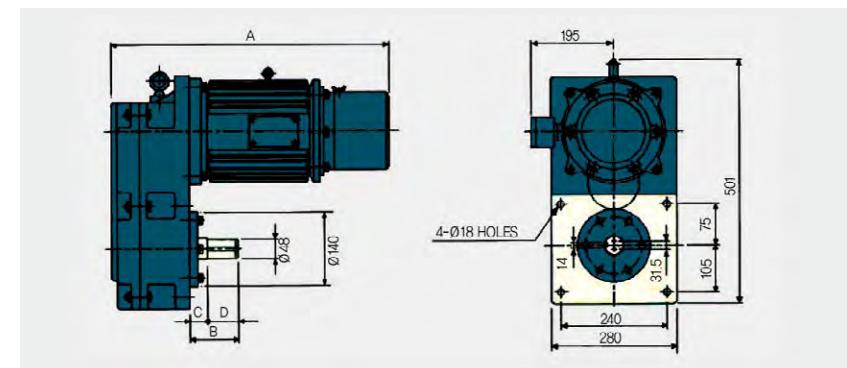

■ Model - B

	1.5Kw × 6P	2.2Kw × 4P
A	550	550
B	84	84
C	59	59
D	5	5
Ratio	1/20.26	

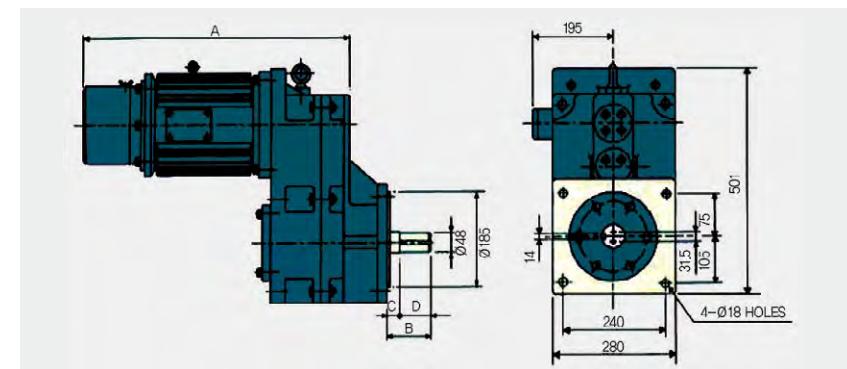

■ Model - C

	2.2Kw x 6P	3.7Kw x 4P
A	650	650
B	95	95
C	35	35
D	60	60
Ratio		1/22

■ Model - D

	2.2Kw × 6P	3.7Kw × 6P
A	650	650
B	105	105
C	41	41
D	64	64
Ratio		1/22
